Do you need to move seamlessly from winter to spring in the wardrobe department? These 5 trends will help you do it.

Colored Jeans are a must because you can stay warm in great skinny jeans, but wear them in bright colors well into spring. A variety of colors can be found anywhere from Target to Nordstrom (who offers free tailoring.)

Mod Eyes feed my fanship of cat eyes and thick black liner. Use a liquid liner pen and extend the liner past the corners of your eyes. When the weather starts to get warmer, “mod”-ify the eye by using fun colors. Purple pops green eyes and navy makes brown eyes look great.

Statement Necklaces like the one worn by Charlize Theron throughout the entire movie *Young Adult*. It’s an adorable Stella and Dot heart necklace (\$50,

stelladot.com). Find one simple piece and make it your signature. Mine is an aquamarine pendant. Wear it with everything to tie your outfits together day-by-day.

Spray Tanning keeps pale-complexioned people who care looking healthy all year long. Late winter is a great time to start spray tanning. Start with a light coat at a tanning salon, or spray at home with a drugstore product to keep your costs down. Deepen the shade, as the weather gets warmer.

Cardigans that are lightweight, in various colors like black, grey, mint, tan, et cetera, work all year long. I love to toss them over a t-shirt and they can be taken off when the mercury rises. J. Crew is my go-to for great cardis.

Try these trends and keep warm while you're staying cool!
